MEMORANDUM FOR: Assistant Chief of Staff for Intelligence,

Department of the Air Force

SUBJECT

: Request for NPIC "Target Briefs"

REFERENCE

: AFCIN Memo, dated 22 August 1961, Subject: Headquarters USAF Requirement for National Photo Interpretation Center's IBM Card Deck for Target Briefs (U)

- 1. The "target briefs" developed by the National Photographic Interpretation Center (NPIC) over a period of several years were designed to provide a summary of information, much of it unevaluated, useful to the Photo Interpreter in identifying facilities located during the immediate readout operation at NPIC. The Center initially prepared by itself "target briefs" on the 300-400 highest priority COMOR targets on the Soviet Bloc. For summaries on an additional 3000-4000 priority 2 targets submitted to COMOR by Army, Navy, USAF and CIA, COMOR participants having primary interest in particular types of targets were asked to help. Several of the participants agreed to contribute with the stipulation that the "target briefs" not be disseminated by NPIC inasmuch as they consisted of unevaluated data intended only for the guidance of the PI. Personnel of your commend have made several verbal requests for these "target briefs", but in view of agreements not to disseminate this unevaluated data such reguests have been refused pointing out that while working at NPIC on joint readout, USAF personnel would be and have been given full access to them.
- 2. I realize that the USAF would like to put the NPIC "target briefs" into the hands of every analyst working with KEYHOLE photography. However, in accordance with agreements described and in view of the
